CONFINED SPACES
CAN BE DANGEROUS

DANGER

CONFINED SPACE ENTRY BY PERMIT ONLY

NEVER Enter A Confined Space Unless You Are Authorized To Do So!

Confined spaces can be dangerous because of:

1 **Lack of Oxygen**

2 **Deadly Fires**

3 **Toxic Vapor**

4 **Physical Hazards**
   - For example: moving parts, falls, and live wires

To protect yourself:

- **Learn what confined spaces exist in your facility.**

- **Don't enter without an approved entry permit.**

- **Cut off steam, water, heat, gas, and power lines, and remember to use lockout/tagout procedures.**

- **Wear the PPE you've been given.**

- **Test for oxygen, combustibility, and toxicity before and after you enter the space.**

- **Be prepared for hazards and have an escape route.**
